

IN THE CLAIMS:

1. (currently amended) Golf shoes comprising:

outsoles including multiple jointing holes installing spikes respectively;
uppers sewed or adhered with the outer circumstance of the top of the
outsoles; and

mid-soles and insoles stacked sequentially to the outsoles within the
uppers, wherein:

protrusions ~~12 and 12'~~ are protruded from the surroundings of the jointing
holes ~~11 and 11'~~ formed at the outsoles ~~10 and 10'~~ of the golf shoes, and protruded
more and more from the inside to the outside direction to have a slope from the
outside to the inside direction;

the inside of the toe of the right outsole [[10']] is rounded to make rotation
of the right golf shoe smooth at the finish step; and

the outsole [[10]] of the left golf shoe, making a role of a prop at the finish
step, is wider than the outsole [[10']] of the right golf shoe to widen the contact
area with the ground in maximum.

2. (currently amended) The golf shoes according to claim 1, wherein:

the rear area of the hard insoles ~~30 and 30'~~ of the golf shoes includes the
impact absorption holes ~~33 and 33'~~ including the impact absorption plates ~~34 and~~
~~34'~~ to absorb the weight of a golfer and a shock at the impact step; and

F-7938

the insoles ~~30 and 30~~ are thicker more and more from the outside to the inside direction to make the foot horizontal with the ground when the golfer wears the golf shoes.
